

This **Yucca** is the purest available. Unlike other brands which can have less than 1/10 of 1% in a filler base, this is **100% pure Yucca**.

Yucca is an *adaptogen* and adrenal balancer helping to support over-used adrenal systems.

It is also filled with natural plant *saponins* which encourage natural-forming steroids in the body without the side-effects of cortisone

Yucca has also been used in cases of hives perhaps because of the steroid-like effects

It is a component of the joint supplement, **Free & Easy** Formulas for horses and dogs; in the human formula, *Boswellan* is used instead.

It is also a component of **Herbal Green**; the same formula is available in bulk or capsules.

Some individuals who use the **Free & Easy** for their horses and dogs with severe arthritis find it advantageous to also add some extra **Yucca** rotating it with **MSM**. ■
