

# NEW! Dynamite® Ultimate Dog Food

Dynamite's new Ultimate dog food is the culmination of decades of experience and research from a large collection of experienced dog food manufacturers, scientists, handlers and breeders. Unlike most kibbled dog foods, the Ultimate dog food comes in the form of a meal. By keeping the dog food uncooked with minimal processing we have been able to maintain the vitamins, enzymes, living material and other heat sensitive ingredients intact. The Ultimate dog food can be considered a "concentrate" - you will see we have left out the typical cereal fillers. By mixing in your choice of fiber sources, this feed can be catered to all breeds and all sizes to mirror what the dog would find in nature.

Available Size: 25 lb bag (11.31 Kg)

\*Source of calcium ascorbate is Ester-C which is a registered trademark of The Ester-C Company.

Matted and underweight pound dog "Zipper" saved by Kat Castilow, and turned into a thriving Dynamite family member in Seattle, WA.

## Feeding Instructions:

Feed 1 to 1<sup>3</sup>/<sub>4</sub> cup per dog per day. Our initial feeding trials suggest better performance of this diet when fed with additional fiber. Try adding carrots, green beans and a little parsley, either steamed or pureed in blender. Or, our PGR (Pelleted Grain Ration) also works great and dogs love it or a little steamed organic brown rice.
